Forward looking statements

This document contains statements, estimates or projections that constitute “forward-looking statements” concerning the financial condition, performance, results, strategy and objectives of Coca-Cola Europacific Partners plc and its subsidiaries (together CCEP or the Group). Generally, the words “ambition”, “target”, “aim”, “believe”, “expect”, “intend”, “estimate”, “anticipate”, “project”, “plan”, “seek”, “may”, “could”, “would”, “should”, “might”, “will”, “forecast”, “outlook”, “guidance”, “possible”, “potential”, “predict”, “objective” and similar expressions identify forward-looking statements, which generally are not historical in nature.

Forward-looking statements are subject to certain risks that could cause actual results to differ materially from CCEP’s historical experience and present expectations or projections, including with respect to the acquisition of Coca-Cola Amatil Limited and its subsidiaries (together “CCL” or “API”) completed on 10 May 2021 (the “Acquisition”). As a result, undue reliance should not be placed on forward-looking statements, which speak only as of the date on which they are made. These risks include but are not limited to:

1. those set forth in the “Risk Factors” section of CCEP’s 2021 Annual Report on Form 20-F filed with the SEC on 15 March 2022 and as updated and supplemented with the additional information set forth in the “Principal Risks and Risk Factors” section of this document;

2. risks and uncertainties relating to the Acquisition, including the risk that the businesses will not be integrated successfully or such integration may be more difficult, time consuming or costly than expected, which could result in additional demands on CCEP’s resources, systems, procedures and controls, disruption of its ongoing business and diversion of management’s attention from other business concerns;

3. the extent to which COVID-19 will continue to affect CCEP and the results of its operations, financial condition and cash flows will depend on future developments that are highly uncertain and cannot be predicted, including the scope and duration of the pandemic and actions taken by governmental authorities and other third parties in response to the pandemic;

4. risks and uncertainties relating to the global supply chain, including impact from war in Ukraine, such as the risk that the business will not be able to guarantee sufficient supply of raw materials, supplies, finished goods, natural gas and oil and increased state-sponsored cyber risks;

5. risks and uncertainties relating to the global economy and/or a potential recession in one or more countries, including risks from elevated inflation, price increases, price elasticity, disposable income of consumers and employees, pressure on and from suppliers, increased fraud, and the perception or manifestation of a global economic downturn; and

6. risks and uncertainties relating to potential global energy crisis, with potential interruptions and shortages in the global energy supply, specifically the natural gas supply in our territories. Energy shortages at our sites, our suppliers and customers could cause interruptions to our supply chain and capability to meet our production and distribution targets. The impacts, including potential increases in energy prices, are expected to be exacerbated during the approaching colder months of the year.

Due to these risks, CCEP’s actual future results, dividend payments, capital and leverage ratios, growth, including growth in revenue, cost of sales per unit case and operating profit, free cash flow, market share, tax rate, efficiency savings, achievement of sustainability goals, including net zero emissions, and the results of the integration of the businesses following the Acquisition, including expected efficiency and combination savings, may differ materially from the plans, goals, expectations and guidance set out in forward-looking statements (including those issued by CCL prior to the Acquisition). These risks may also adversely affect CCEP’s share price. Additional risks that may impact CCEP’s future financial condition and performance are identified in filings with the SEC which are available on the SEC’s website at www.sec.gov. CCEP does not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as required under applicable rules, laws and regulations. Furthermore, CCEP assumes no responsibility for the accuracy and completeness of any forward-looking statements. Any or all of the forward-looking statements contained in this filing and in any other of CCEP’s or CCL’s public statements (whether prior or subsequent to the Acquisition) may prove to be incorrect.

Reconciliation & definition of pro forma financial information and alternative performance measures

The following presentation includes pro forma financial information and certain alternative performance measures, or non-GAAP performance measures. Refer to our Unaudited Results for the Second Quarter & Half Year Ended 1 July 2022, issued on 4 August 2022, which details our non-GAAP performance measures and reconciles, where applicable, our 2022 and 2021 results as reported under IFRS to the pro forma financial information and non-GAAP performance measures included in this presentation. This presentation also includes certain forward looking non-GAAP financial information. We are not able to reconcile forward looking non-GAAP performance measures to reported GAAP measures without unreasonable efforts because it is not possible to predict with a reasonable degree of certainty the actual impact or exact timing of items that may impact comparability.
