Note Regarding the Presentation of Pro forma financial information and Alternative Performance Measures

Pro forma financial information

Pro forma financial information has been provided in order to illustrate the effects of the acquisition of Coca-Cola Amatil Limited (referred to as CCL pre acquisition, API post acquisition) on the results of operations of CCEP in 2021 and allow for greater comparability of the results of the combined group between periods. The pro forma financial information for 2021 has been prepared for illustrative purposes only and because of its nature, addresses a hypothetical situation. It is based on information and assumptions that CCEP believes are reasonable. For further information, refer to our 2021 Annual Report on Form 20-F filed with the SEC on 15 March 2022, which provides further details on our non-GAAP performance measures and reconciles, where applicable, our results as reported under IFRS to Pro forma financial information and non-GAAP performance measures.

The Pro forma financial information presented in this document reflects the inclusion of API revenue as if the acquisition had occurred at 1 January 2021 and prepared on a basis consistent with CCEP accounting policies.

The pro forma financial information does not intend to represent what CCEP's results of operations actually would have been if the acquisition had been completed on the dates indicated, nor does it intend to represent, predict or estimate the results of operations for any future period or financial position at any future date. In addition, it does not reflect ongoing cost savings that CCEP expects to achieve as a result of the acquisition or the costs necessary to achieve these cost savings or synergies. As pro forma information is prepared to illustrate retrospectively the effects of future transactions, there are limitations that are inherent to the nature of pro forma information. As such, had the acquisition taken place on the dates assumed, the actual effects would not necessarily have been the same as those presented in the Pro Forma financial information contained herein.

Alternative Performance Measures

We use certain alternative performance measures (non-GAAP performance measures) to make financial, operating and planning decisions and to evaluate and report performance. We believe these measures provide useful information to investors and as such, where clearly identified, we have included certain alternative performance measures in this document to allow investors to better analyse our business performance and allow for greater comparability. To do so, we have excluded items affecting the comparability of period-over-period financial performance as described below. The alternative performance measures included herein should be read in conjunction with and do not replace the directly reconcilable GAAP measures.

For purposes of this document, the following terms are defined:

"As reported" are results extracted from our consolidated financial statements.

"Pro forma" includes the results of CCEP and API as if the Acquisition had occurred at the beginning of 2021. In this document, the Pro forma financial information adjustments reflect the inclusion of API revenue as if the acquisition had occurred at the beginning of 2021 and prepared on a basis consistent with CCEP accounting policies.

"Comparable" is defined as results excluding items impacting comparability, which include restructuring charges, acquisition and integration related costs, inventory fair value step up related to acquisition accounting, the impact of the closure of the GB defined benefit pension scheme, net impact related to European flooding and net tax items relating to rate and law changes. Comparable volume is also adjusted for selling days.

"Pro forma Comparable" is defined as the pro forma results excluding items impacting comparability, as described above.

"Fx-neutral" or **"FXN"** is defined as period results excluding the impact of foreign exchange rate changes. Foreign exchange impact is calculated by recasting current year results at prior year exchange rates.

"Dividend payout ratio" is defined as dividends as a proportion of comparable profit after tax.

Unless otherwise stated, percent amounts are rounded to the nearest 0.5%.

API

- Q3 volume growth reflects solid trading in Australia & NZ, further supported by the recovery of the AFH channel with soft comparables in all markets from cycling tough restrictions last year. Solid strategy & execution to navigate industry-wide supply constraints in Australia & NZ also supported volume growth.
- Coca-Cola No Sugar outperformed in Australia & NZ, & Monster volume grew in all markets.
- Revenue/UC^[14] growth driven by positive channel & pack mix from the recovery of the AFH channel, underlying price & promotional optimisation in Australia.

France

- Q3 volume growth reflects strong trading in the AFH channel, with favourable weather & the recovery of tourism leading to double-digit volume growth versus 2019. Home channel demand remained resilient, also achieving double-digit volume growth versus 2019. Strong overall performance despite industry-wide supply constraints.
- Coca-Cola Original Taste & Zero Sugar, Fuze Tea, Capri-Sun & Monster outperformed, with volume ahead of 2019.
- Revenue/UC^[14] growth driven by further underlying price & positive customer mix from the continued recovery of the AFH channel.

Germany

- Q3 volume growth reflects the continued recovery of the AFH channel, further supported by favourable weather. Continued strong performance in the Home channel supported by the successful navigation of industry-wide supply constraints & the border trade business resulted in volume ahead of 2019.
- Coca-Cola Zero Sugar, Fuze Tea & Monster outperformed, with volume ahead of 2019.
- Revenue/UC^[14] growth driven by underlying price, positive brand mix (e.g. Monster volume +20.0% in Q3) & pack mix from the continued recovery of the AFH channel.

Great Britain

- Q3 volume growth reflects continued strong trading in the AFH channel, with favourable weather contributing towards double-digit volume growth vs 2019. Higher at-home consumption trends led to resilient demand in the Home channel, also achieving double-digit volume growth versus 2019.
- Coca-Cola Zero Sugar, Fanta, Sprite & Monster outperformed, with volume ahead of 2019.
- Revenue/UC^[14] growth driven by underlying price & promotional optimisation, alongside positive pack mix led by IC packs e.g. small PET volume +13.5% in Q3.

Iberia

- Q3 volume growth reflects momentum in the AFH channel recovery, achieving volume ahead of 2019 levels, supported by the continued recovery of tourism & favourable weather. The increased Spanish VAT rate continued to impact volume within the Home channel.
- Coca-Cola Zero Sugar & Monster both outperformed, with volume ahead of 2019.
- Revenue/UC^[14] growth driven by further underlying price & positive pack & channel mix led by the on-going recovery of the AFH channel e.g. small glass volume +12.0% in Q3.

Northern Europe

- Q3 volume growth reflects continued trading momentum in the AFH channel. Continued strong demand in the Home channel supported overall volume growth ahead of 2019.
- Coca-Cola Zero Sugar, Fanta & Monster all outperformed, with volume ahead of 2019.
- Revenue/UC^[14] growth driven by underlying price, alongside positive pack & channel mix from the continued recovery of the AFH channel e.g. small glass volume +16.5% in Q3.

Forward-Looking Statements

This document contains statements, estimates or projections that constitute “forward-looking statements” concerning the financial condition, performance, results, strategy and objectives of Coca-Cola Europacific Partners plc and its subsidiaries (together CCEP or the Group). Generally, the words “ambition”, “target”, “aim”, “believe”, “expect”, “intend”, “estimate”, “anticipate”, “project”, “plan”, “seek”, “may”, “could”, “would”, “should”, “might”, “will”, “forecast”, “outlook”, “guidance”, “possible”, “potential”, “predict”, “objective” and similar expressions identify forward-looking statements, which generally are not historical in nature.

Forward-looking statements are subject to certain risks that could cause actual results to differ materially from CCEP’s historical experience and present expectations or projections, including with respect to the acquisition of Coca-Cola Amatil Limited and its subsidiaries (together “CCL” or “API”) completed on 10 May 2021 (the “Acquisition”). As a result, undue reliance should not be placed on forward-looking statements, which speak only as of the date on which they are made. These risks include but are not limited to:

1. those set forth in the “Risk Factors” section of CCEP’s 2021 Annual Report on Form 20-F filed with the SEC on 15 March 2022 and as updated and supplemented with the additional information set forth in the “Principal Risks and Risk Factors” section of the H1 2022 Half-year Report filed with the SEC on 4 August 2022;
2. risks and uncertainties relating to the Acquisition, including the risk that the businesses will not be integrated successfully or such integration may be more difficult, time consuming or costly than expected, which could result in additional demands on CCEP’s resources, systems, procedures and controls, disruption of its ongoing business and diversion of management’s attention from other business concerns;
3. the extent to which COVID-19 will continue to affect CCEP and the results of its operations, financial condition and cash flows will depend on future developments that are highly uncertain and cannot be predicted, including the scope and duration of the pandemic and actions taken by governmental authorities and other third parties in response to the pandemic;
4. risks and uncertainties relating to the global supply chain, including impact from war in Ukraine, such as the risk that the business will not be able to guarantee sufficient supply of raw materials, supplies, finished goods, natural gas and oil and increased state-sponsored cyber risks;
5. risks and uncertainties relating to the global economy and/or a potential recession in one or more countries, including risks from elevated inflation, price increases, price elasticity, disposable income of consumers and employees, pressure on and from suppliers, increased fraud, and the perception or manifestation of a global economic downturn; and
6. risks and uncertainties relating to potential global energy crisis, with potential interruptions and shortages in the global energy supply, specifically the natural gas supply in our territories. Energy shortages at our sites, our suppliers and customers could cause interruptions to our supply chain and capability to meet our production and distribution targets. The impacts, including potential increases in energy prices, are expected to be exacerbated during the approaching colder months of the year.

Due to these risks, CCEP’s actual future results, dividend payments, capital and leverage ratios, growth, including growth in revenue, cost of sales per unit case and operating profit, free cash flow, market share, tax rate, efficiency savings, achievement of sustainability goals, including net zero emissions, and the results of the integration of the businesses following the Acquisition, including expected efficiency and combination savings, may differ materially from the plans, goals, expectations and guidance set out in forward-looking statements (including those issued by CCL prior to the Acquisition). These risks may also adversely affect CCEP’s share price. Additional risks that may impact CCEP’s future financial condition and performance are identified in filings with the SEC which are available on the SEC’s website at www.sec.gov. CCEP does not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as required under applicable rules, laws and regulations. Furthermore, CCEP assumes no responsibility for the accuracy and completeness of any forward-looking statements. Any or all of the forward-looking statements contained in this filing and in any other of CCEP’s or CCL’s public statements (whether prior or subsequent to the Acquisition) may prove to be incorrect.
